

AWNING FABRICS
2011 - 2014 COLLECTION

The leader in quality and innovation, decade after decade.

For over 50 years, Sunbrella® has been the leader in performance fabrics. And there's good reason people look to Sunbrella first for their fabric needs. No one else brings so much under one revolutionary, stylish brand.

No other resource is more committed to leading the performance fabric industry with innovations that fit today's lifestyles. With enhanced quality, additional colours and sophisticated styles, the next generation of Sunbrella offers more possibilities than ever.

a BEAUTIFUL
performance

Enduring Colour

Sunbrella colours stay strong and vibrant, even through intense sunlight exposure and cleaning with bleach.

Sumptuous Hand

Sunbrella fabrics are as soft and inviting as they are durable.

Dramatic Effects

Sunbrella awning fabrics are available in 78 solids, stripes and exquisite decorative jacquards.

Worry Free

Sunbrella fabrics resist stains and fading, so you can stop worrying about your fabric and enjoy life.

In harmony with the environment.

Sunbrella creates no wastewater from dyeing.

Sunbrella® fabric's unique colouring process avoids harmful effluents associated with conventional dyeing processes. It also dramatically reduces water and energy consumption.

Sunbrella finishing processes consume less water.

Continual improvement in the Sunbrella finishing application process at the Wasquehal, France plant allows us to use the same water several times for successive operations, as well as to recycle most of our wastewater. Heat from our wastewater is also recuperated to warm our clean water.

Sunbrella fabrics are extremely durable.

Sunbrella fabrics are engineered to last two to ten times longer than conventional fabrics. Thanks to their extended lifecycle, the long term environmental impact of Sunbrella fabrics is considerably less than that of cotton canvas, for example.

Sunbrella fabrics are safe for people and nature.

Sunbrella fabrics have been tested according to Oeko-Tex 100: this label certifies that they contain no harmful substances, and present no hazards to health, skin or the environment.

Sunbrella fabrics are Greenguard Indoor Air Quality Certified. The Greenguard designation ensures that Sunbrella Awning fabrics are a low-emitting product and can be used indoors or in any application where enhanced air quality is preferred with the confidence that these fabrics will contribute to healthy indoor air.

Sunbrella fabrics are durable.

Sunbrella superior pigments are added during the production of fade-resistant Sunbrella fibre. The final result is Sunbrella yarn and fabric with colour throughout that won't fade or wash away. Think "carrot".

In ordinary fabrics, dyes are added to the surface of the yarn or fabric. The colour only penetrates the outer layer and washes out or fades away over time. Think "radish".

Avoids
Greenhouse
Effect

Sunbrella fabrics are easy to clean.

Sunbrella fabrics are amazingly easy to maintain, and most spills can be cleaned with mild soap and water. For tough stains, bleach can be used without fear of damaging the fabric or removing the color.

The best way to keep Sunbrella fabrics looking good is to properly maintain them by brushing off dirt before it becomes embedded and wiping up spills as soon as they occur.

Additionally, a topical finish is applied to all Sunbrella fabrics to help them repel liquids making it even easier to maintain.

Repels Water
and Stain

Resists Fade

Sunbrella fabrics protect you from the elements.

The Skin Cancer foundation recommends Sunbrella as an aid in the prevention of sun-induced damage to the skin.

Please use shading products featuring Sunbrella as a part of your complete sun protection regime, including regular use of sunscreen.

WARRANTY

10

YEARS

SUNBRELLA® AWNING FABRICS CONVENTIONAL 10-YEAR WARRANTY ON 12/14/2010

Dickson Constant warrants the rot-proof properties and colour fastness (7/8 minimum colour fastness under exposure to ultra-violet rays and bad weather conditions, according to the NF EN ISO 105 B02 and NF EN ISO 105 B04 standards – variations in shade over time are therefore limited) of its Sunbrella awning fabrics for 10 years.

This warranty is valid under the following terms and conditions:

- For 8 years, Dickson Constant shall either replace free of charge or, at its convenience, reimburse the invoice value of the section of fabric recognized as faulty, excluding any costs or any other compensation for any reason whatsoever.
- In the event of a justified complaint after the 8th year, and taking into account depreciation due to wear, the warranty will consist of a discount on the purchase of a new fabric: 30% during the 9th year and 15% during the 10th year, at the rate applicable on the day of the complaint. This rate is available on demand from your dealer.
- Any complaint must be sent within ten days of the defect being noticed, accompanied by the purchase invoice, via registered mail with confirmation of receipt to the retailer where the product was initially bought. He will acknowledge the defect and transmit your request to Dickson-Constant.
- The fabric must be kept available to the experts of Dickson Constant or its insurance company.
- Replacement or reimbursement of the defective fabric does not extend the duration of the original warranty.

This conventional warranty covers only the rot-proof properties and colour fastness of Sunbrella fabrics regularly maintained, under normal use and environment. It shall under no circumstances pose an obstacle to the legal guarantees.

See general warranty conditions on www.dickson-constant.com

Care and cleaning

Comfortable, beautiful, and oh so liveable, Sunbrella fabric makes your outdoor room worry-free. It's amazingly easy to maintain, and most stains can be cleaned with mild soap and water. For tough stains, bleach can be used without fear of damaging the fabric or removing the colour. With this kind of durability and a wide range of styles, what's not to love?

One of the best ways to keep Sunbrella fabrics looking good and to delay deep or vigorous cleaning is to properly maintain the fabrics. This can be accomplished by simply brushing off dirt before it becomes embedded in the fabrics, wiping up stains as soon as they occur or spot cleaning them soon after.

General or light cleaning

- Brush off any loose dirt.
- Hand wash as follows:
 - Prepare a cleaning solution of 60 ml mild soap for 4 l of lukewarm water (less than 40°C).
 - Clean with a soft bristle brush and allow cleaning solution to soak into fabric.
 - Rinse thoroughly and allow fabric to air dry.

Heavy cleaning for stubborn stains and mildew

Sunbrella fabric does not promote mildew growth, however, mildew may grow on dirt and other foreign substances that are not removed from the fabric. To clean mildew, or other stubborn stains:

- Prepare a solution of 240 ml of bleach and 60 ml of mild soap for 4l of clean water. Spray on entire area and allow to soak into the fabric.
- Scrub vigorously with a soft bristle brush, rinse thoroughly and allow fabric to air dry.

If stain and/or mildew are severe, bleach quantities may be increased.

Re-treating the fabric for ease of cleaning

Sunbrella fabrics have a special finish that enhances water repellency. The finish is designed to last for several years of normal use, but may be refreshed with a water repellent product. This last one restores your fabrics' lost water-repellency. It stops leaks, resists soiling, impedes mildew formation and protects against the sun's harmful UV rays. It is also very efficient in preventing seam leakage. For more information about retreatment products, visit www.dickson-constant.com.
